

Declaration of Conformity

EU Packaging and Packaging Waste Regulation (EU) 2025/40

This is to declare that MELITEK products comply with the applicable substance requirements of Article 5 of EU Packaging and Packaging Waste Regulation (EU) 2025/40 (PPWR).

Heavy Metals

Based on our knowledge of the product compositions and information provided by our suppliers, we confirm that the combined concentration of the heavy metals listed below does not exceed the limit of 100 mg/kg (100 ppm) set out in Article 5(4) of the PPWR. As these substances are not expected to be present above this limit, we do not test every raw material or finished product for trace amounts.

- Cadmium (Cd)
- Hexavalent Chromium (Cr(VI))
- Mercury (Hg)
- Lead (Pb)

PFAS

Based on our knowledge of our product compositions and available information from our suppliers, we confirm that PFAS (per- and polyfluoroalkyl substances) are not intentionally used in the manufacture or formulation of our products. As PFAS are not expected to be present in the product at concentrations exceeding the limits specified in Article 5(5) PPWR (relating to food-contact packaging), we do not test each raw material or product we produce for trace amounts of these substances.

IMPORTANT

This statement covers only the Article 5 requirements under Regulation (EU) 2025/40 (PPWR) that apply to MELITEK plastic compounds. It is not a declaration of full PPWR compliance. The operator placing the final packaging on the market is responsible for assessing its compliance and meeting all applicable downstream obligations.

MELITEK A/S
